

Hanish Water

Technical Details

Model:	HW-520-BG-NZSI-WC10-P2
Dimensions:	29" H, 9" D, 25" W
Vessel Size:	3-5x20"
Vessel Volume:	4.5 Gallons
Dry Weight:	45 LB
Inlet / Outlet Connection:	1"
Operating Temperature:	38 - 110 F
Operating Pressure:	10 - 125 psi
PH:	6.5 - 8.5
Ferrous Iron, Max:	.03 mg/L
Copper, Max:	1.3 mg/L
Water Pressure:	2 - 125 psi
Flow Rate:	14 - 18 gpm
Manufacturing:	Waukesha, WI. USA

***This Water Filter should not be used for water that is not microbiologically safe and should not be used for well water unless there is an adequate water test report to determine if and what type of pre-treatment is required to produce the water that you desire.**

****The blue shroud shown in the images of this brochure is not included with the WaterCrest - 10. There is an extra fee for the blue shroud.**

Hi, my name is Al Vanden Heuvel. I am a Master Plumber, water treatment expert and manager of Pro Services. I like to tell people that I am in the used water business.

It's been said that all the water on the earth has been used at least once. If that is true then we are all consuming used water. Think about that for a minute. When water gets used it also gets polluted from thousands of contaminants, some very harmful and some not so harmful. My goal is to provide you and your family with the best possible water for the least possible price.

New Hanish Water customers often ask what they can expect from their new WaterCrest-10. Because Physical Water Processing is a unique water treatment process in itself, the end result is also unique as compared to all existing, out dated, and wasteful water treatment technologies. What you can expect from your new WaterCrest-10 is a system that produces odorless, colorless, great tasting, scale free water at every tap in your home. AT EVERY TAP! Not just at the kitchen sink. What's more, the WaterCrest-10 accomplishes this by using NO electricity, NO moving parts, NO wasted water, and NO salt. Why is this significant? Because it's never been done before. Finally, you get everything that you have ever wanted in a water treatment system all in one neat package. The WaterCrest-10. There's nothing like it on this, or any other planet!

**Finally...Something New...
Something Revolutionary**

The Most Effective, Efficient and Affordable Whole House Water Filter in the World

Like No Other Filter In The World

The WaterCrest-10 by Hanish Water is a one-of-a-kind whole house filter and is a monumental break through in technology. The WaterCrest-10 is an "Ultra Filter" removing viruses and contaminants down to 0.2 microns. This greatly reduces heavy metals, drugs, pesticides, bacteria, chlorine and all its by-products, and hundreds of other potential harmful contaminants.

Breakthrough Technology In Water Treatment

For years water softeners, and reverse osmosis drinking water system have been the only means of reliably treating water in homes. These are expensive, wasteful, and out dated technologies that require monthly maintenance and care.

Recent scientific developments have made it possible for the average homeowner to now treat the water at every tap in their home efficiently and with no monthly maintenance. These technologies have all come together to form the WaterCrest-10 whole house water processor.

Unlike any other water treatment system on the market today, The WaterCrest-10 treats your water for taste, odors, chlorine, scale buildup and hundreds of other contaminants using **NO** electricity, **NO** drain line, **NO** wasted water, **NO** moving parts, and **NO** salt. There are **NO** chemicals, **NO** operating cost* and the WaterCrest-10 is made of 100% recyclable materials right here in the USA.

All you get is safe, clean, clear, scale free great tasting drinking water at every tap in your home including your shower and bath. Your water will still contains all of the healthy minerals that your body needs on a daily basis.

60 Day - 100% Money Back Guarantee
25 Year Manufacturers Warranty

How It Works

Stage 1:

BioGuard (BG)

The BioGuard filters your water at the sub micron level. This means that it can treat your water for turbidity, bacteria, virus's, cysts, drugs, taste, odors and other foreign matter that can make your water taste and look bad.

Stage 2:

NanoZinc Scaleinhibitor (SI)

The NanoZinc ScaleInhibitor cartridges can treat your water for taste, odors, color, chlorine, and scaling on all of your water related appliances, including your water heater and all plumbing throughout your entire home.
